

T2- Animal Technician
Salary £18,623 - £19,637
Wyton, Cambridge and
Grimston, East Yorkshire Sites

About Us

At Marshall UK we breed animals for biomedical research and our animals have been used in both human and animal medical breakthroughs.

Key Duties and Responsibilities

Animal Husbandry: including feeding, watering and cleaning. Animal Production: including birthing, weaning, sexing, weighing, counting animals and labelling pens. Promoting a culture of high standard of care and welfare. Mentoring trainee members of staff. Ensuring all work is carried out as per the Establishment and Project licences. Reporting concerns and recommending improved ways of working.

Opportunities

Company induction programme that includes manual handling, fire safety, COSHH and biosecurity training. On the job training in all aspects of animal care, welfare and breeding. Career progression programme that may include IAT Levels 2 & 3, personal licence training, NACWO training, RAnTech, fire marshal, first aid. Networking opportunities. Sector specific training and workshops.

Basic Requirements

Five GCSEs including Maths, English and a Science subject or equivalent. Level 2 in Animal Management. A desire to work with animals. Empathy and compassion for animals, whilst understanding their use to support biomedical research. Experience in animal husbandry. Experience in a laboratory animal unit is desirable. Excellent communication skills with the confidence and diplomacy to interact with all levels of staff. IT literate and familiar with standard PC software. Think and act proactively and be willing to respond positively to change.

Things to Consider

37.5 hours per week Monday - Friday. Some out of hours work may be required over weekends, evenings and holiday periods. Transport to the site is essential. Life assurance, Health Scheme, Cycle to work scheme, Occupational Health, annual flu vaccines, 25 days paid annual leave, company pension. A reasonable amount of physical work is required. You may be required to work in a *shower in* unit. You may be required to work in units other than your usual place of work. You will be required to wear personal protective equipment.
